

We embroider  
innovative products

# new technics new functions

The major advantage of embroidery is to locate appliques where ever you want.

We use the precision and flexibility to muster conductive threads, strands, wires or heating conductors on textiles.

## EMBRO: Partner for smart textiles

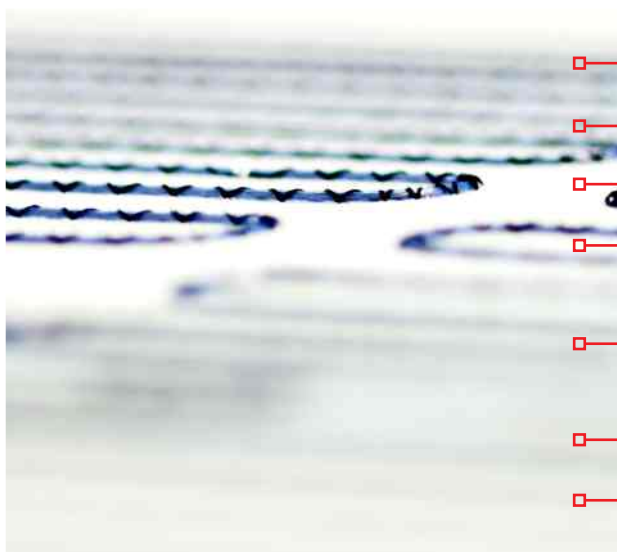

We are specialists and we develop and manufacture smart textiles.

Our clients come from various industrial sectors and they most appreciate:

- the expertise and expert knowlegde referring to smart textiles,
- the efficiancy of our modern computerized machines,
- our realisation of innovative and new ideas regarding design and development.

We have special skills in developing customized products.

We can generate your ideas and products in high-volume or just in smal batches.

ultraflexible, textile,  
electric heater elements

safety textiles

textile sensors

composite applications

CNC-laser technology and  
laser cutting of textiles

functional textiles  
for medical engineering

ultraflexible RFID-antennas

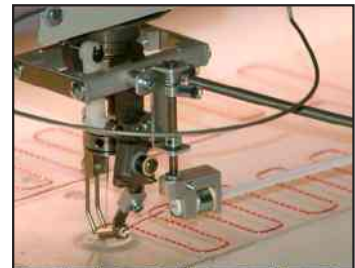

Our embroideries are innovative with the finest quality : „made in germany“

## Embroidery

We can manufacture a wide range of products and almost all kinds of materials you wish.

With highest precision we can place yarns, wires or hoses exact where it is been needed.

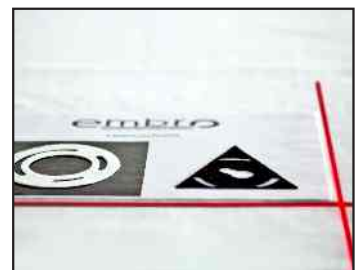

Sensor elements or antennas - any structures can be depicted and even delicate materials can be used.

## Laser Cutting

Even Elaborate layouts we can, accurate to the millimetre, cut out of textile surfaces. Traditional textiles, knitted fabrics or highly specialized technical textiles: no problem for us.

We have modern CAD tools to manufacture in small batches or in high volume.

## Bonding

There are a lot of different ways to apply materials on fabrics.

We offer perfect and economical solutions with different splice and solderings. In that case the parts are evenly pressed together and produced in series.

Do you want solutions that are adjustable, simple and economical?

Are you looking for a partner that can help you with the development of a product?

Do you want to optimise your serial production ?

Come to us! EMBRO stands for innovative and technical embroideries, efficient fabrication, innovation joy, short response times and top quality.
