Multiturn Wirewound Potentiometer

Series AC

The robust AC potentiometers in 20 mm housing are suitable for applications where a precise and economical multiturn potentiometer is important.

- Economical and precise multiturn sensor with numerous options
- Completely encapsulated housing with 2 x sleeve bearings
- With many options e.g. limit switch, slipping clutch

The sintered bearing in the back cover gives the shaft improved stability. The completely encapsulated housing increases the robustness in addition. The potentiometer is available in 5 or 10 turn version.
