

Let's connect!
KVM can be so simple
kvm-tec

Master line-dual-fiber

DUAL DVI-D DVI-I USB 2.0 KVM Extender
Resolution 1920x1200@60 Hz
Max. Distance 160km/99mi in Fiber
1x SFP module Multimode up to 500m/1640 ft.
Alternativ with single mode up to 20km/12mi
Full HD videos in real time
USB 2.0 transparent- in house development
Only two duplex multimode fiber cables (LC) for USB and video
Can be used in the Matrix Switching System up to 48 endpoints

www.kvm-tec.com

The highly optimized KVM Extender over IP has a range of 500m/1640ft (with SFP up to 160 km/99mi) at a resolution of 1920x1200 @ 60 Hz and is available in fiber as dual version. The perfect tuning of kvm-tec video compression with a low latency time enables a delay-free transmission of the Signals. USB and video are transmitted via two duplex multimode (LC) fiber cables. With DVI extension without loss of quality, Full HD videos can be transmitted in real time.

The transparent USB 2.0 interface already supports tablets and touch screens, sound modules, printers and much more in the standard version. USB upgrade is available for memory sticks and USB hard drives. High reliability and robust design make the low-cost kvm-tec Extender ideal for many applications.

The kvm-tec feature „USB save“ prevents the intrusion of viruses via the USB interface by deactivating mass storage devices. With the Switching upgrade the MVX2-F can be integrated with standard components in Matrix Switching Systems up to 48 endpoints

.... smart connections

- USB save feature
- Automatic Plug & Play installation
- DVI extension without loss of quality
- Ultra compact up to 2 extender in 19" 1RU
- Local (CPU) / remote (CON) Monitor output
- Firmware Flash Upgrade without cable
- Transmission rate max 480 Mbit/s
- screw on DVI Connector
- Warranty 2 years, warranty extension to 5 years possible

kvm-tec = C⁴

kvm-tec upgrades

Pre-installed & unlockable

- USB memory
- Analog VGA - transmitted as DVI
- Sound analog in both directions in CD quality
- Matrix Switching System up to 48 endpoints

Manual	QUICK INSTRUCTION Manual Download: www.kvm-tec.com		

CONNECT kvm-tec Extender in Matrix Switching Systems and you can go up to 2000 endpoints and have a super fast switching. You can connect a wide range of different sources (servers, operator workstation, PC, surveillance camers, video walls and much more) and operate & control the system with centralized management

Network Environent; 1 or 10 Gbit bandwidth
IGMP Snooping (for videosharing)

COLLABORATE with standard network components. kvm-tec Extender are compatible with standard network components and all kvm-tec Extender can collaborate in real time with 60Hz in full HD or 4K resolution

COMMUNICATE in your Switching System with our kvm-tec Switching Manager Software. The local and remote Extender are arranged in an optimized way and the Extender status is high-lighted in color. With the kvm-tec Systems computers and servers can be located away from work desk into central server room for a high security level. The environment heat and noise are reduced at the work station and an ergonomic and quiet workplace for all users is possible

CONTROL your application in a much better way with all our in-house developments, like USB 2.0 transmission, video compression without latency, only one cable for USB and video transmission ,zero latency. With our unique features each user can access multiple PC sources and can control and operate up to 16 screens with one mouse & keyboard. Video sharing can be done seamless and a central video wall can be integrated for sharing all informations in real time
