

SANAIR RANGE

The SANAIR® range (registered trademark) is made up of products manufactured in copolymer polypropylene and dedicated to the maturing of your cheeses.

Easy to use by all, the size is adapted to the European standard format allowing the optimisation of your surfaces in cellars and during transport.

AGEING BASKET

- Length : 800 mm
- Width : 400 mm
- Overall height : 140 mm
- Stacking height : 125 mm
- Maximum height of the cheese : 85 mm
- Weight : 3,5 Kg

- 2 round cheeses, unstacked
Ø 390 mm (basket with open sides),
Ø 370 mm (basket with closed sides)
- 2 square cheeses 310 mm
- Useful surface : 300x70 mm

AGEING BOARD

- Standard dimensions for one board :
1100x350 mm,
thickness 25 mm
- Weight : 4,7 Kg

FOR AGEING BASKETS

- Standard dimensions for one
pallet : 1200x800 mm
- Weight : 15.9 Kg

Stackable and mechanizable
Secure stacking and moving

Aerated
Homogeneity of cheese ageing

Complete system (basket + pallet)
Optimization of space
Better ageing capacity in the same cellar space
Reduction of the ageing time

Cleanability foreseen from the design phase
Easy maintenance, quick drying
Only one washing tunnel and fast rotation in the factory
