ASCO Dry Ice Reformer R70i

part no. 901510

The **ASCO** Dry Ice Reformer R70i has been developed for producing dense dry ice blocks in various sizes by compressing dry ice pellets. **Be it in combination with an existing or with a new dry ice pelletizer, the ASCO Dry Ice Reformer R70i is a very convenient tool to complement the dry ice pellet business with dry ice blocks.**

The compact machine is driven by a powerful and unique hydraulic unit featuring instant push button start. All functions are controlled by a Siemens PLC. A Siemens touch screen provides good overview and easy operation, a comprehensive monitoring, easy maintenance and optimal service planning. An integrated production control system allows to define and supervise the amount of blocks or weight to be produced.

** This choice of sizes is only an extract and helps as production indication. The thickness or the weight of the blocks is alternatively stepless adjustable.

ASCO Dry Ice Reformer R70i: Function and applications

The **ASCO** Dry Ice Reformer R70i is started on the 7" Siemens comfort touch screen panel. All functions are controlled by the inbuilt PLC. Dry ice pellets with a diameter of 3 mm (1/8 ") are filled into the dry ice hopper. From there they are conveyed to the pressing chamber automatically, where they are predosed and compressed into high-quality dry ice blocks.

To ensure continuous, reliable operation of the reformer, oil level, cycle time, operation hours, due date of service, motor overload, amount of produced dry ice blocks since last start and hydraulic pressure are all monitored and displayed on the touch screen of the R70i's PLC.

Dry Ice Reformer R70i: Key features

- **SIEMENS PLC** - controls the complete process, filling of the pressing chamber and the hydraulic with its main and side cylinder.
- **Siemens comfort touch screen 7" HMI** - Multilingual 7" Touch-Screen with different access levels and adjustable parameters.
- **Integrated production control system** - definition and supervision of amount of blocks or weight to be produced.
- **Alternatively thickness or weight of blocks stepless adjustable** (16 to 60 mm (0.6 to 2.4 in) resp. 650 to 2'430 g (1.4 to 5.4 lb). Corresponding calculation happens automatically.
- **Integrated block thickness control and fill level monitoring** - if the required amount of dry ice pellets in the hopper falls short, the machine automatically goes into a waiting mode until the correct fill level is reached again.
- **High process reliability** - optimal process monitoring provides optimal performance and high process reliability.
- **Remote control devices** - offers a wide range of possibilities to link Industry 4.0 with dry ice production
- **System integration** - can be combined with all ASCO pelletizer and ASCO packaging machines APM120.
