

EC Tightening System with Torque Control YETC-210

Features YETC-210 ETB

- Easily to program according to joint parameters.
- Improved electronics with 32-bit processor architecture for faster *Torque Control* during tightening process.
- Torque calculation over several impulses (average) – see above depiction.
- Standard 1 tool controller. Optionally available as 4 tool model. With latter up to 4 impulse wrenches with different torque adjustment and programming can be controlled by the same controller (alternate use).
- Compensation pulses programmable for minimized subsidences (on soft joints).
- Poka Yoke: error-proof assembly.
- 2-step tightening optionally.
- 8 groups programmable with different parameter sets.
- 36-pin parallel interface (Centronics) for printout.
- 25-pin serial interface (RS-232C) for data export.
- External shut-off valve.
- 8 points input terminal and 8 non-voltage output relays enable line integration (PLC), implementation of a multi-coloured light signal stack, etc.

Additional Features YETC-210 EA

- Bi-directional communication.
- Automatic group change (programmable sequence).
- Display of date and time.
- Timer function for group tightening.
- Integrable into all production processes.
- Statistics functionality, process ability factors Cp and Cpk.
- Circular memory for 9 999 tightening cycles.

Additional Features YETC-210 EA-L

- Ethernet 100 BASE-TX/10 BASE-T, autodetect function.
- Protocol TCP/IP.
- LAN port 8P8C (RJ-45).
- 9-pin serial interface (RS-232C) instead of 25-pin port.

EC Tightening System with Torque Control YETC-210

Example protocols for standard tightening

a) with enabled group monitoring

Example for: Upper Torque Limit: 40 N·m
Lower Torque Limit: 35 N·m

Group Name	Group No. / Remaining	Torque N·m	Pulse No.	Judgement
a	1 - 4	36.1	24	OK
a	1 - 3	37.1	23	OK
a	1 - 2	37.1	23	OK
a	1 - 1	37.0	22	OK
a	2 - 4	36.5	24	OK
a	2 - 3	29.2		UNDER
a	2 - 3	20.6		UNDER
a	2 - 3	31.7		UNDER
a	2 - 3	37.8	27	OK
a	2 - 2	36.2	23	OK
a	2 - 1	36.6	24	OK
a	3 - 4	42.6		OVER
a	3 - 4	37.3	27	OK
a	3 - 3	36.5	25	OK
a	3 - 2	37.1	26	OK
a	3 - 1	38.8	23	OK

NOTE: With the 4 channel controller the tool No. would stand before the group name, e.g.:

1a	1 - 4	36,1	25	OK
----	-------	------	----	----

In the accompanying example the logging is illustrated during switched on group monitoring: The system counts down all OK tightenings within one group and moves forward to the next group after the group OK.

Readable is that in group #1 all 4 joints were tightened without objection.

At group #2 on the second joint the target torque was achieved only in the fourth attempt – and finally judged as OK. Once all joints in this group were judged as OK the system releases this group and jumps to the next group.

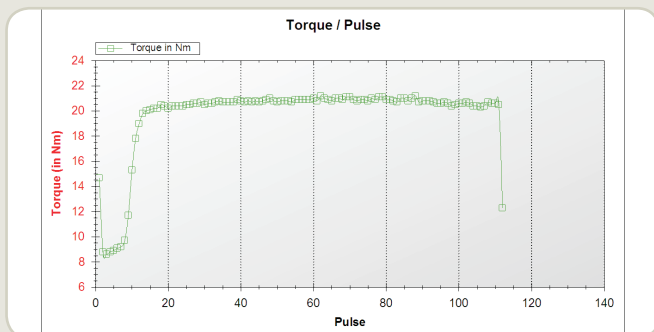

In group #3 on the first joint the target torque was exceeded first (OVER). The second tightening was judged as OK.

(Any stated prices are valid per unit in Euro plus VAT and/or any custom fees exw Hamburg, incl. package. Subject to change. Errors excepted.)

EC Tightening System with Torque Control YETC-210

*Option:
Software tool for the
analysis of the tightening
process with torque
as control parameter
and impulse number as
second parameter.*

b) with disabled group monitoring

Example for: Upper Torque Limit: 40 N·m
Lower Torque Limit: 35 N·m

Group Name	Joints No.	Torque N·m	Pulse No.	Judge-ment
a	1	36,1	26	OK
a	2	37,1	29	OK
a	3	37,1	27	OK
a	4	37,0	26	OK
a	5	36,5	28	OK
a	6	29,2		UNDER
a	6	10,6		UNDER
a	6	31,7		UNDER
a	6	37,8	24	OK
a	7	36,2	26	OK
a	8	36,6	27	OK
a	9	42,6		OVER
a	9	37,3	25	OK
a	10	36,5	28	OK

In the second example the logging is illustrated during switched off group monitoring: The system counts up all tightenings and jumps to the next joint only in each case of OK.

Readable is, that joint #1 to #5 were tightened without objection and judged as OK.

On joint #6 the target torque has three times fallen below (UNDER) and been achieved only in the fourth attempt – and finally judged as OK.

On joint #9 the target torque was exceeded first (OVER). The second attempt has been judged as OK.

(Any stated prices are valid per unit in Euro plus VAT and/or any custom fees exw Hamburg, incl. package. Subject to change. Errors excepted.)
