

GEAR LOCKER PROFI

spacious compartments and clever details

With a compartment width and depth of 55 cm each, the PROFI gear locker offers a lot of storage space. The spacious helmet compartment can accommodate particularly large helmets.

Body:

- torsion-resistant, made of sheet steel
- aluminium clothes rail made of oval profile with three non-twisting metal hooks
- two material hooks fixed at the side, position can be changed as needed
- perforated base plate
- smooth, easy-clean surfaces
- height-adjustable feet made of square tubing (fixed feet as an option)

Helmet holder:

- fixed or flexible helmet holder
- height ca. 20 cm
- alternative mounting on top of the cabinet

Valuables compartment with slot:

In case of need, keys and wallet are quickly stowed away in the valuables compartment via the slot. The combination lock then allows the valuables compartment to be opened easily.

Variants:

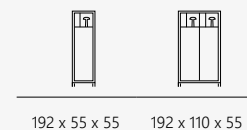

- for 1 or 2 persons
- feet, plinth or wall assembly
- zinc-plating

Inner dimensions (ca. HxWxD):

- compartment: 135 x 53 x 53 cm
- Helmet compartment: 35 x 36 x 53 cm
- Valuables compartment: 35 x 16 x 40 cm

Dimensions HxWxD in cm

Flexible helmet holder (optional)

The gear locker can be equipped with the flexible helmet holder. The hinged technology guarantees quick helmet retrieval with only one hand movement.

Locks

As standard, the gear lockers are equipped with a cylinder lock or latch lock. Further locks can be installed on request.

Paintwork

The high-quality powder coating of body and doors is available in almost all RAL colours. Light grey, Flame red and Gentian blue are included in the price.

Valuables compartment

The compartment with inserting slot allows valuables to be stored quickly even with the door locked. The rubber-coated base softens impact and prevents scratches.

You can find further information about our range of high-quality steel furniture on our website. We would be pleased to send you our catalogue and advise you on site or on the phone.
