

# SAFETY DATA SHEET MARINE D 40/12

According to Regulation (EC) No 1907/2006, Annex II, as amended by Regulation (EU) No 453/2010

SECTION 1: Identification of	of the substance/mixture and of the company/undertaking	
1.1. Product identifier		
Product name	MARINE D 40/12	
1.2. Relevant identified use	es of the substance or mixture and uses advised against	
Identified uses	Marine Oil Please look at the Technical Data Sheet of the product for further information.	
1.3. Details of the supplier of the safety data sheet		
Supplier	OPET FUCHS MADENİ YAĞ SAN. ve TİC. A.Ş. Atatürk Organize Sanayi Bölgesi 10006 Sok. No:12 35620 Çiğli/İZMİR Tel: +90 232 376 78 38 Fax: +90 232 376 78 39	
1.4. Emergency telephone number		
Emergency telephone	UZEM (National Poison Consultancy Center): 114 Emergency Health Service:112	
SECTION 2: Hazards ident	ification	
2.1. Classification of the su	bstance or mixture	
Classification (EC 1272/200		
Physical hazards	Not Classified	
Health hazards	Not Classified	
Environmental hazards	Not Classified	
Human health	May cause sensitisation or allergic reactions in sensitive individuals. USED OILS are more dangerous than new oils. Used oils may contain hazardous components which have the potential to cause skin cancer.	
Environmental	The product is not expected to be hazardous to the environment.	
Physicochemical	The product is not classified as flammable,but at a temperature above the flash point is flammable when exposed to flame sources.	
2.2. Label elements		
Hazard statements	EUH208 Contains Benzoic acid, hydroxy-,mono-C20-28-branched alkyl derivs., calcium salts (2:1). May produce an allergic reaction.	
2.3. Other hazards		

By handling of mineral oil products and chemical products no particular hazard is known when normal precautions (item 7) and personal protective equipment (item 8) are kept.

# SECTION 3: Composition/information on ingredients

# 3.2. Mixtures

Composition comments	Note L: The product contain special performance additives and base oils which are
	considered to be severely refined and not considered to be carcinogenic. All of the base oils in
	the product have been demonstrated to contain less than 3% (w/w) dimethyl sulfoxide extract
	by the IP 346 test.

# **SECTION 4: First aid measures**

4.1. Description of first aid measures		
General information	Get medical attention if any discomfort continues. Not expected to give rise to an acute hazard under normal conditions of use.	
Inhalation	Move affected person to fresh air at once. Rinse nose and mouth with water. Get medical attention if any discomfort continues.	
Ingestion	Rinse mouth thoroughly with water. Contact physician if larger quantity has been consumed. Never give anything by mouth to an unconscious person. Do not induce vomiting.	
Skin contact	Remove contaminated clothing immediately and wash skin with soap and water. Continue to rinse for at least 15 minutes. Get medical attention. Get medical attention if any discomfort continues. Remove affected person from source of contamination. Wash clothing before reuse.	
Eye contact	Get medical attention if any discomfort continues. Do not rub eye. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 15 minutes.	
4.2. Most important symptoms and effects, both acute and delayed		
Inhalation	No specific symptoms known.	
Ingestion	No specific symptoms known.	
Skin contact	May cause sensitisation or allergic reactions in sensitive individuals.	
Eye contact	No specific symptoms known.	
4.3. Indication of any immediate medical attention and special treatment needed		
Notes for the doctor	Symptomatic treatment should be applied. In case of excessive inhalation of the product vapor may lead to lung inflammation (chemical pneumonitis). Dermatitis may result from prolonged or repeated exposure.	
Specific treatments	Treat symptomatically.	
SECTION 5: Firefighting meas	sures	
5.1. Extinguishing media		
Suitable extinguishing media	Use Film-Making Foam Concentrate (A.F.F.F.) to extinguish the burning product. If not available, extinguish with dry chemical powder due to the size of fire. If the product is in pressurized container, cool with water spray jet.	
Unsuitable extinguishing media	During a fire, DO NOT extinguish by applying pressurized water and water jet directly on the burning product. Use water fog to cool down.	
5.2. Special hazards arising from the substance or mixture		
Specific hazards	This product is not explosive. Do not heat up near flash point.	
Hazardous combustion products	In case of fire toxic and corrosive gases may form. These gases: Carbon dioxide, carbon monoxide, sulphur oxides, phosporus oxides, metal oxides	
5.3. Advice for firefighters		

Protective actions during firefighting	In case of fire, shut off flow if it can be done without risk. Stop leak if safe to do so. Move undamaged containers from fire area if it can be done without risk. Prevent the burning product from entering into drainage system to avoid release of the product. To prevent spreading of the product build-up binders or barriers by using non-burning material such as sand. Use air-supplied respirators to protect against gases/fumes in case of fire-fighting.
Special protective equipment for firefighters	Fire-fighting should be done by trained personnel. Special protective full-clothing, air-supplied respirator, gloves and protective goggles should be worn. Dry chemical sand used for fire extinguishing and other fire extinguising equipment should meet the national and international standards.

# SECTION 6: Accidental release measures

#### 6.1. Personal precautions, protective equipment and emergency procedures

Personal precautionsIn case of spills, beware of slippery floors and surfaces. Avoid inhalation of vapours and<br/>contact with skin and eyes. Provide adequate ventilation. For personal protection, see Section<br/>8. Do not smoke, use open fire or other sources of ignition. Wear protective gloves and (in<br/>case of splashes) goggles/face shield too.

#### 6.2. Environmental precautions

# **Environmental precautions** Avoid release to the environment. Avoid discharge into drains,water courses or onto the ground. To prevent release,place container with damaged side up. Spillages or uncontrolled discharges into watercourses must be IMMEDIATELY alerted to local appropriate regulatory body. Empty container contains product residue which may exhibit hazards of product.

#### 6.3. Methods and material for containment and cleaning up

Methods for cleaning up Large Spillages: Stop leak if possible without risk. DO NOT touch spilled material! Collect and place in suitable waste disposal containers and seal securely. For waste disposal, see Section 13. Avoid the spillage or runoff entering drains, sewers or watercourses. Inform authorities if large amounts are involved. Small Spillages: Stop leak if possible without risk. Dam and absorb spillage with sand,sawdust or other absorbent. Absorb in vermiculite, dry sand or earth and place into containers. Dispose of via an authorised person/licensed waste disposal contractor in accordance with local regulations.

## 6.4. Reference to other sections

Reference to other sectionsFor handling and storage, see section 7. For personal protection, see Section 8. See Section11 for additional information on health hazards. See Section 12 for additional information on<br/>ecological hazards. For waste disposal, see Section 13.

## SECTION 7: Handling and storage

## 7.1. Precautions for safe handling

Usage precautions	Provide adequate ventilation. Container must be kept tightly closed when not in use. Protect against direct sunlight. Avoid spilling, skin and eye contact. Avoid eating, dringking and smoking when using the product.	
Advice on general occupational hygiene	Wash after use and before eating, smoking and using the toilet. Take off contaminated clothing and wash it before reuse.	
7.2. Conditions for safe storage, including any incompatibilities		
Storage precautions	Store in tightly-closed, original container in a dry, cool and well-ventilated place. Protect from freezing and direct sunlight. Store in closed original container at temperatures between 0°C and 50°C.	
Storage class	Not special storage precautions required.	

7.3. Specific end use(s)

# Usage description For containers or container linings, use mild steel or high density polyethylene (HDPE). For containers or container linings, avoid PVC. Polyethylene containers should not be exposed to high temperatures because of possible risk distortion. SECTION 8: Exposure Controls/personal protection 8.1. Control parameters Occupational exposure limits There are no exposure limit values. 8.2. Exposure controls Protective equipment Appropriate engineering Avoid inhalation of vapours. Observe any occupational exposure limits for the product or controls ingredients. Provide adequate ventilation. Eye/face protection Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. The following protection should be worn: Chemical splash goggles or face shield. Hand protection Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. It is recommended that gloves are made of the following material: Nitrile rubber. It should be noted that liquid may penetrate the gloves. Frequent changes are recommended. Other skin and body Wear steel toe-cap shoes. Wear an apron. protection Hygiene measures Provide eyewash station. Do not smoke in work area. Wash hands after contact. Promptly remove non-impervious clothing that becomes contaminated. Contaminated clothing should be placed in a closed container for disposal or decontamination. Remove contaminated clothing and wash the skin thoroughly with soap and water after work. When using do not eat, drink or smoke. **Respiratory protection** If ventilation is inadequate, suitable respiratory protection must be worn. Wear a respirator fitted with the following cartridge: High-efficiency particulate filter. STEL: 10mg/m<sup>3</sup> 15 minutes. Form: Oil mist, mineral Environmental exposure controls TWA: 5mg/m<sup>3</sup> 8 hours. Form: Oil mist, mineral Short-Term Exposure Limit (STEL). The National Institute for Occupational Safety and Health (NIOSH, 1992). Time-Weighted Average (TWA). Occupational Safety and Health Administration (OSHA, 29 CFR 1910.1000, Table Z-1). SECTION 9: Physical and Chemical Properties 9.1. Information on basic physical and chemical properties

Appearance	Clear Liquid
Colour	Amber.
Odour	Mild, oily.
Flash point	245°C COC (Cleveland open cup).

Bulk density	0,896 kg/l @ 15°C
Solubility(ies)	Insoluble in water.
Viscosity	167,0 mm²/s @ 40°C 15,8 mm²/s @ 100°C
Explosive properties	Not considered to be explosive.
Oxidising properties	Does not meet the criteria for classification as oxidising.
Comments	Values are typical. These values may be variable within the product specification.
9.2. Other information	
Refractive index	No specific test data are available.
SECTION 10: Stability and rea	activity
10.1. Reactivity	
Reactivity	No test data specifically related to reactivity available for this product or its ingredients.
10.2. Chemical stability	
Stability	Stable at normal ambient temperatures. Mixing with any other material.
10.3. Possibility of hazardous	reactions
Possibility of hazardous reactions	No potentially hazardous reactions known.
10.4. Conditions to avoid	
Conditions to avoid	Avoid freezing. Avoid contact with strong oxidising agents. Avoid exposure to high temperatures or direct sunlight. Keep away from moisture.
10.5. Incompatible materials	
Materials to avoid	Strong oxidising agents. Strong acids.
10.6. Hazardous decomposition	on products
Hazardous decomposition products	Does not decompose when used and stored as recommended. Heating may generate the following products: Toxic and corrosive gases or vapours. Thermal decomposition or combustion products may include the following substances: Carbondioxide,carbon monoxide,sulphur oxides,phosphorus oxides,metal oxides.
SECTION 11: Toxicological int	formation
11.1. Information on toxicologi	cal effects
Toxicological effects	No data recorded.
Other health effects	No data available to indicate product or any components are carcinogenic,mutagenic,genotoxic,and chronic health hazards.
Skin corrosion/irritation Skin corrosion/irritation	No specific test data are available.
Serious eye damage/irritation Serious eye damage/irritation	No specific test data are available.
Respiratory sensitisation Respiratory sensitisation	No specific test data are available.
Skin sensitisation Skin sensitisation	May cause sensitisation or allergic reactions in sensitive individuals.

Gene call indiagenicity         No specific test data are available.           Carcinogenicity         Carcinogenicity           Carcinogenicity         No specific test data are available.           Reproductive toxicity         Reproductive toxicity           Reproductive toxicity - fertility         No specific test data are available. All of the base oils in the product have been demonstrated to contain less than 3% (u/w) dimethyl sulfoxide extract by the IP 346 test. USED ENGINE OILS are more dangerous than new engine oils. Used engine oils may contain hazardous components which have the potential to cause skin cancer.Route of entryInhalation,ingestion,skin,eye contact.Target organsSkin,eyes,respiratory system,lungs,gastro-intestinal tract.SECTION 12: Ecological InformationThe product is not expected to be hazardous to the environment.12.1. ToxicityThe roduct is not expected to be hazardous to the environment.12.2. Persistence and degradabilityThe product is not readily biodegradable.12.3. Bioaccumulative potentialThe product is not readily biodegradable.12.4. Mobility in soilThe product is insoluble in water and will spread on the water surface. It may absorbed by soil	Inhalation		
Eye contactNot expexted to cause eye irriation. Vapors formed from heating may cause eye irriation.Acute and chronic health hazardsThe product contain special performance additives and mineral base oils which are considered to be severely refined and not considered to be carcinogenic. All of the base oils in the product have been demonstrated to contain less than 3% (w/w) dimethyl sulfoxide extract by the IP 346 test. USED ENGINE OILS are more dangerous than new engine oils. Used engine oils may contain hazardous components which have the potential to cause skin cancer.Route of entryInhalation,ingestion,skin,eye contact.Target organsSkin,eyes,respiratory system,lungs,gastro-intestinal tract.SECTION 12: Ecological InformationThe product is not expected to be hazardous to the environment.12.1. ToxicityThe product is not expected to be hazardous to the environment.12.2. Persistence and degradabilityThe product is not readily biodegradable.12.3. Bioaccumulative potentialThe product is not readily bioaccumulating substances.12.4. Mobility in soilThe product contains potentially bioaccumulating substances.12.4. Mobility in soilThe product is insoluble in water and will spread on the water surface. It may absorbed by soil	Ingestion		
Acute and chronic health hazardsThe product contain special performance additives and mineral base oils which are considered to be severely refined and not considered to be carcinogenic. All of the base oils in the product have been demonstrated to contain less than 3% (w/w) dimethyl sulfoxide extract by the IP 346 test. USED ENGINE OILS are more dangerous than new engine oils. Used engine oils may contain hazardous components which have the potential to cause skin cancer.Route of entryInhalation,ingestion,skin,eye contact.Target organsSkin,eyes,respiratory system,lungs,gastro-intestinal tract.SECTION 12: Ecological InformationEcotoxicityThe product is not expected to be hazardous to the environment.12.1. ToxicityThere is no specific test data available12.2. Persistence and degradabilityThe product is not readily biodegradable.12.3. Bioaccumulative potentialThe product contains potentially bioaccumulating substances.12.4. Mobility in soilThe product is insoluble in water and will spread on the water surface. It may absorbed by soil	Skin contact	May cause sensitisation or allergic reactions in sensitive individuals.	
hazardsconsidered to be severely refined and not considered to be carcinogenic. All of the base oils in the product have been demonstrated to contain less than 3% (w/w) dimethyl sulfoxide extract by the IP 346 test. USED ENGINE OILS are more dangerous than new engine oils. Used engine oils may contain hazardous components which have the potential to cause skin cancer.Route of entryInhalation,ingestion,skin,eye contact.Target organsSkin,eyes,respiratory system,lungs,gastro-intestinal tract.SECTION 12: Ecological InformationEcotoxicityThe product is not expected to be hazardous to the environment.12.1. Toxicity ToxicityThere is no specific test data available12.2. Persistence and degradability Persistence and degradabilityThe product is not readily biodegradable.12.3. Bioaccumulative potentialThe product contains potentially bioaccumulating substances.12.4. Mobility in soil MobilityThe product is insoluble in water and will spread on the water surface. It may absorbed by soil	Eye contact	Not expexted to cause eye irriation. Vapors formed from heating may cause eye irriation.	
Target organsSkin,eyes,respiratory system,lungs,gastro-intestinal tract.SECTION 12: Ecological InformationEcotoxicityThe product is not expected to be hazardous to the environment.12.1. and will not be mobile.	Mobility	The product is insoluble in water and will spread on the water surface. It may absorbed by soil and will not be mobile.	

12.6 Other adverse effects

# **MARINE D 40/12**

# 12.5. Results of PBT and vPvB assessment

Results of PBT and vPvB	There is no specific test data available.
assessment	

12.0. Other adverse enects	
Other adverse effects	Not known.
SECTION 13: Disposal considerations	
13.1. Waste treatment met	thods
General information	Waste to be treated as controlled waste. Only disposal to licensed waste disposal site in accordance with local Waste Disposal Authority.
Disposal methods	Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. Do not allow runoff to sewer,waterway or ground.
Waste class	13 02 06*Synthetic engine, gear and lubricating oils 13 02 08*other engine, gear and lubricating oils

# SECTION 14: Transport information

General

The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADR/RID).

# 14.1. UN number

Not applicable.

## 14.2. UN proper shipping name

Not applicable.

## 14.3. Transport hazard class(es)

No transport warning sign required.

## 14.4. Packing group

Not applicable.

# 14.5. Environmental hazards

# 14.6. Special precautions for user

Not applicable.

# 14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code

Transport in bulk according to Not applicable. Annex II of MARPOL 73/78 and the IBC Code

# SECTION 15: Regulatory information

#### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

# EU legislation Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures (as amended). Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) (as amended).

## 15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

SECTION 16: Other information	
Key literature references and sources for data	December 13, 2014, No. 29204, "the Ministry of Environment and the Ministry of Urban Development Related to Safety Data Sheets on Hazardous Substances and Mixtures Direction"
Revision comments	Revised classification.
Issued by	EBRU SEN R&D Engineer Certificated by NBC for MSDS (Certificate No: 01.42.06) Opet Fuchs Madeni Yağ San. Tic. A.Ş. AOSB Mustafa Kemal Bulvarı No:12 35620 Çiğli/İZMİR E-mail: ebru.sen@opetfuchs.com.tr
Revision date	11/09/2017
Revision	3
Supersedes date	13/12/2010
SDS number	OPET.GBF.2303
Hazard statements in full	EUH208 Contains Benzoic acid, hydroxy-,mono-C20-28-branched alkyl derivs., calcium salts (2:1). May produce an allergic reaction.

This information is based on our current knowledge and is intended to describe the product for the purposes of health, safety and environmental requirements only. It should not therefore be construed as guaranteeing any specific property of the product. No warranty or representation, express or implied is made as to the accuracy or completeness of the data and information contained in this data sheet. OPET FUCHS MADENI YAG SAN. VE TIC. A.Ş. shall not be responsible for any injury or damage resulting from the abnormal use of the product, recipient assumes all such risks.
