MANAGEMENT SOFTWARE

SW-1100

**CONFIGURATION AND COMMERCIAL MANAGEMENT** APPLICATION

SW-1100 is an effective tool that communicates with PC scales for a complete business management; it is also an emulator of the CS-1100 W PC scales application, usually used for the design and customization of the scale templates.

Functions

- User's interface customization.
- Selection of customizable screen templates for all kind of businesses.
- Generating of articles database (fruits, vegetables, fishes, shellfish, meats, butcher...) with pictures.
- Management of:
  › traceability.
  › ingredients.
  › sales.
  › stocks.
  › inventory regularization.
  › delivery notes and invoicing.
  › cash drawer: money income and withdrawals.
  › advertising on buyer's display: commercials, pictures, presentations and videos.
- Easy to use. Selling operations are simple and intuitive: searching and selection of articles, checking and reopening of receipts, changing of prices...
- Organization of articles in easy access sections.
- Use of data processed by the scales with total and detailed selling lists and graphics (by article, customer, vendor, term...).
- Application of price lists associated to each store or client.
- Cross-selling: showing the picture of a complementary product on buyer's display when selling a product.
- Working mode: receipt, label, register voucher, pre-packed, automatic and self-service weighing.
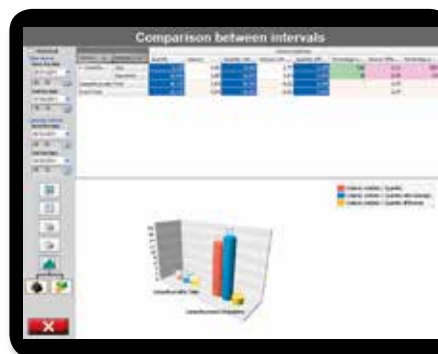

Operating system

- Windows.
