

OVERFLOW FILLING MACHINE

DESCRIPTION

This Filling Machine is gravity type filling machine which is suitable for filling thin fluid.

The machine is made by in-line structure, filling head quantity can be custom-made according to different production capacity such as 6/8/10/12/16/20 heads.

The filling volume is controlled by filling time, with weight feedback of each filling nozzle to PLC to assure good filling accuracy.

It is economical filling machine for filling product like glass cleaner, wine, vinegar, water, juice etc in foodstuff, cosmetic and daily chemical industries.

1. All pipe use quick-change connector.
2. Height and space between filling heads can be changed quick and easy to operate.
3. All filling valve use ESG valve instead of traditional valve by general manufacturer.
4. All filling heads can be diving from the bottom of bottle to start filling.

SPECIFICATION

1.	Operational mode	automatic
2.	Type	Linear
3.	Measurement precision	+0.5%-1% for 5L-1L
4.	Capacity	800b/h-7200b/h
5.	Voltage	220VAC 50/60hz
6.	Air pressure	4~6kg/cm ²
7.	Air consumption	1m ³ /min
8.	Power	1000w
