

CONTINUOUS FORM FILL AND SEAL MACHINE

servo X 800

THE MODULAR HIGH-END ALL-ROUNDER FOR LARGE FORMAT

servo X 800

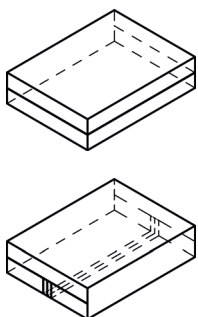

The servo X 800 are the most flexible and powerful of film packaging machines in the horizontal large-format segment – and all this with maximum modularity.

They can be configured individually and thus meet all requirements.

Whether chain infeed or infeed conveyor, servo X 800 machines win over with their continuous packaging process and no stop-and-go, meaning dead time is not an issue when sealing. Besides high performance, this enables extremely tight-fitting and precise packaging with a saving in film of up to 15 %. This ensures that the film packaging's excellent appearance is unrivalled.

HIGHLIGHTS

- Extremely tight bag packaging with lowest possible material use and optimum processing of the most diverse of film thickness and film types (e.g. recyclable mono-material films, recycled content films, ultra thin films from approx. 7 µm, etc.)
- Siemens TIA Portal or Rockwell Automation control system; free remote service
- Smart user guidance via CoPilot and touch screen
- Maximum serviceability and maintainability thanks to perfect access and numerous maintenance-free components
- Easy line integration and connectivity with higher-level systems, Industry 4.0 Ready
- Optional monitoring, analysis and visualisation of machine and operating data via the Hugo Beck Cockpit

TECHNICAL DATA

Product infeed	manual as standalone/automatic in line
Film	centre-folded and flat film, e.g. PE, PO, PP, bio films, recycled content films
Product size	L: from 150 mm, W: 150 – 800 mm, H: max. 450 mm
Capacity	up to 5.000 cycles/h
Versions	Side seal, bottom overlap with or without sealing/ionisation
