INTERMITTENT FORM FILL AND SEAL MACHINE

# flexo 700 e-com (fit)
# FILM PACKAGING FOR E-COMMERCE, MAIL ORDER AND LOGISTICS

## flexo 700 e-com
## flexo 700 e-com fit

With the flexo 700 e-com you are optimally equipped to meet the demands of film packaging for the e-commerce, mail order and logistics sectors.
Whether dealing with the direct dispatch of individual goods, packing groups of products or meeting the complex requirements of returned goods packaging for example, the **flexo 700 e-com** packs goods with a minimum use of film and automatically adjusts the film bags to the product`s length as standard.

To support the precise fitting of shipping bags, the **flexo 700 e-com fit** model also adjusts the bag size to the product's width so that the machines fully automatically adjust to varying product sizes during the packaging process.

Additional options include the ability to add an easy-opening perforation to the bags as well as inserting a double-sided adhesive tape for resealing a bag for returns.

## HIGHLIGHTS

- Tight bag packaging with lowest possible material use and optimum processing of the most diverse of film thickness and film types (e.g. recyclable mono-material films, recycled content films, etc.)
- Each bag size is automatically adapted to the product's length as standard, and also to the product's width as an option
- As an option, easy-opening perforation and inserting of a double-sided adhesive tape for resealing the bag
- Connection to ERP or control systems
- Integrated scanner with a controller for product detection and creation of a shipping label
- Free remote service
