SLIDING

# CORVISION SLIDING

## DESCRIPTION

Corvision, the meeting between the minimal aspect and the possibilities of your project.  
This solution proposed in all these variants brings us closer to the exact idea of our vision.  
A minimalist uniform covering for all of your needs whatever the criteria.  
Everything has been thought of down to the smallest detail.  
Speed of installation, ease of maintenance for a most remarkable result.  
We have put our heart into releasing this range to suit all budgets.  
Have you dreamed about it, we can make your dream come true

## POSSIBILITIES

This sliding window with thermal break, avant-garde design, maximizes interior light thanks to a minimum aluminum viewing section of only 20mm at the center.

A new type of reinforced frame is designed for all types (1, 2 and 3 rails) which allows the integration of a stainless steel rail for smooth sliding.

Greater weight support (up to 320 Kg / sash) and greater durability.  
We offer 3 types of handles for this system.

First interest; enlarge the glazed surface, increase the opening possibilities or even make it more secure/comfortable such as the integration of a lock for interior/exterior key locking.

Each typology benefits from advantages to ideally meet the needs of your project.

## FEATURES

EN 12208:2000 class 7A

EN 12207:2000 class A 4

EN 12208:2000 class C5

RW Maximum = 41dB
